A Scintillating New Strain of
HARDY CHRYSANTHEMUMS
1944 Dreer’s De Luxe Korean Hybrids

Words as well as pictures are altogether inadequate to portray the marvelous beauty of this superb strain. It has been carefully selected for early blooming, size of the individual flowers, magnificent range of desirable colors, and hardiness. Sown early in the spring the plants will bloom profusely in late autumn of the same year. Pkt. 50c; special pkt. $1.50; ½ oz. $3.00.
101 Years of DREER QUALITY SEEDS — PLANTS — BULBS

Under the guiding hands of expert plant breeders nature again has made it possible for gardeners everywhere to grow this year more beautiful flowers than ever before. In this catalog of Specialties and Novelties we have grouped together the most outstanding new varieties as well as those introduced during recent years. Furthermore there are many of the old standard favorites which are worthy companions to the latest introductions.

Every alert gardener knows that quality is the most important single factor to success because only superior strains can produce superior results. For 101 years Dreer has supplied American gardeners with the finest in Seeds, Plants, and Bulbs. Back of the nation-wide Dreer reputation is a horticultural organization which spares no time or effort to make Dreer products the best that nature can produce under a most rigid system of expert selection and propagation. We are confident that your Dreer garden always will be a joy to you and your friends.

Directions to Customers

Order Early—We suggest that you send us your order as early as convenient. Please keep a copy of the order with which to check the goods when received.

Name and Address—Please write on each order letter your full name, Post Office, County, and State. Also give the street name and house number, or P. O. Box besides the nearest Express Office.

Cash With Order—Remit by Post Office Money Order, Express Money Order, Draft, or Check. If you send cash, register your letter. We cannot be held responsible if these directions are not followed. If you request goods which are "Not Prepaid" to be shipped by Parcel Post please include in your remittance the cost of postage and special packing as explained below. We decline sending goods C. O. D. (Collect on Delivery). Prices are subject to change without notice.

Packing—No charge is made for boxes nor packing on express or freight shipments nor for delivery to freight depot or express office in Philadelphia. The extra cost of "special packing" for parcel post shipments of plants and roots is included in the charges noted below.

"Prepaid" and "Not Prepaid" Shipments in the U. S. A. and Possessions

Seeds Sent "Prepaid"—All Vegetable Seeds, Flower Seeds, and Lawn Grass Mixtures are sent "Prepaid" to any Post Office in the United States or its possessions, or at our option by Express or Freight Prepaid. Customer bears the cost of transportation on all other articles quoted "Not Prepaid".

Plants, Roots, and Bulbs Forwarded "Not Prepaid"—All Plants, Roots, and Bulbs are forwarded "Not Prepaid" by Express which means that the customer pays the cost of transportation. Goods that can be sent by Parcel Post as noted in the catalog will be mailed if you add to your remittance for postage and special packing:

- 10% of their value, east of the Mississippi
- 15% of their value, west of the Mississippi

Minimum charge 10c

We recommend to our customers to have their Plants, Roots, and Bulbs forwarded by Express as our experience shows that this method is usually the most satisfactory, except on small packages.

Sundry—Sundries, except where quoted "Postpaid," are sent either by express or freight the purchaser paying transportation charges.

Local Delivery—There is no charge for delivery of goods in Philadelphia and immediate suburbs.

Time of Shipment—All Seeds, Dormant Roots, Bulbs, and Sundries are forwarded as soon after receipt of order as possible unless shipment at a later time is requested on the order sheet. Roses for the garden will be shipped at proper planting season unless otherwise specified on the order sheet.

Safe Arrival of Packages—We guarantee safe arrival of all goods sent by express or mail to any point within the United States proper. If such packages are injured or lost we will replace them as soon as notified of the fact. Goods sent in any other way travel at purchasers' risk. Claims for damages or errors must be made on receipt of goods. We cannot be held responsible for failure after delivery of goods in good condition.

Non-Warranty

We give no warranty, express or implied, as to description (including kind, variety, and name), quality, or productiveness of any of the seeds, bulbs, or plants we send out and will not in any way be responsible for the crop, and every order for articles purchased from this catalog will be accepted on the conditions only.

Correspondence—Your inquiries will have our prompt attention but we ask that all questions be stated clearly and briefly. Give them on a piece of paper separate from the order sheet and always add your full name and address to each.

Explanation of Symbols

The symbols used throughout this book are bound to help you with your garden planning. They make it easy to tell at a glance the character of the plant and their adaptability to various growing conditions.

A = Annual. Annual flowers complete their life cycle within one growing season. They must be sown every year.

B = Biennial. These require two years to bloom. Seed sown during one season will produce flowering plants the second year. Occasionally they live longer than two years.

HP = Half-Hardy Perennial. These cannot stand much frost but may be kept alive by bringing indoors, placing in the cold frame, or covering securely during the winter.

H = Hardy Perennial. These last for several years, withstanding considerable frost provided the soil is well drained.

TP = Tender Perennial. Tender perennial may be kept growing throughout the year in the house or greenhouse. Many of them are showy bedding plants for a summer and fall display.

§ = Climbing Plants. Climbing and trailing plants which are best grown with a support on which they can climb.

A = Suited to Rock Garden. Most plants suited to rock gardens are also desirable for dwarf beds and borders. The smaller the rock garden the smaller the plants should be.

B = Suited to Semi-Shade. Most plants suited to semi-shade also do well in a sunny exposure. Semi-shade means some sun for part of the day or a location where the plants receive some indirect light from above.

S = Suited to Shade. Few plants do in dense shade but those marked in this way will be found quite satisfactory. There are no annuals which will bloom in deep shade.

+ Seeds marked with a + often are sown in late fall outdoors to germinate the following spring. Spring germination is quickest if they are placed in water and set in the freezing chamber of an electric refrigerator. To secure the beneficial effect of alternate freezing and thawing, thaw them out once a week and then freeze again. They will be ready for sowing after two to three weeks of this treatment.

Novelties and Specialties

Antirrhinum A
Snapdragon

Dreer's Giant Pacific Hybrid Delphinium

The Sensational New Strain from the Pacific Coast

Originator's Stock

The overwhelming response to this new strain of Delphinium has now reached unprecedented proportions. They are truly sensational in every respect and reports from many different sections of the country as well as from abroad are unanimous in their unstinted praise.

"The Most Beautiful Delphinium I have ever seen"

These are the very words of one of our own experts when he first saw them on the Pacific Coast. His opinion is shared by others who say . . . amazingly fine precision of placement of florets . . . rarely a single . . . nicely formed bees . . . fine foliage . . . unusual uniformity of habit . . . marked disease resistance . . . impressive tall spikes of slightly tapering formation. Plants with white bees predominate. These Giant Pacific Hybrids certainly stand out as the showiest and most glorious of all Delphinium.

Note the beautiful proportions and artistic balance of these spikes

Lupins, Russell Hybrids

2865 Russell Hybrids

A most remarkable new strain of Hardy Lupines from Great Britain

Thousands of gardeners by this time have had an opportunity to become personally acquainted with this superb English strain of hardy Lupine. The enthusiastic claims made by the originator were rather conservative but all words are rather poor substitutes to describe the true beauty of any flower. Most gardeners were particularly fascinated by the magnificent color range which includes deep yellow, orange, red, and many bicolor combinations. Pkt. 20c; special pkt. 60c; ½ oz. $1.00.

2866 Selected Russell Hybrids

These are even more beautiful than the original strain. The seed has been saved from named varieties of proved merit so that the color range should be particularly fine. 12 seeds 25c; 50 seeds 65c; 120 seeds $1.25; 250 seeds $2.50.

Nierembergia—Blue Cups

3189 Caerulea (Hippomanica). Graceful plants 4 to 6 inches tall and spreading more than a foot. The fern-like, bright green foliage is hidden by a mass of lovely cup-shaped lavender-blue flowers. Blooms profusely throughout the summer and autumn. Pkt. 25c; special pkt. 75c.

New Pansies

3248 Shakespeare's Pansies. Though small-flowered this is a most desirable little Pansy of simple, quaint beauty. Many charming colors and blooming freely throughout the spring and summer. Pkt. 50c; special pkt. $1.25.

3179 Coronation Gold. A magnificent Pansy of giant size and excellent well-rounded form. The color is canary yellow with the lower petals flushed golden orange. Has lightly ruffled edges. Pkt. 25c; special pkt. 75c.

The Popular Snapdragons

Snapdragons are great favorites. They are easily grown from seed blooming continuously throughout the summer and fall. If protected during the winter, midsummer sowings will produce particularly fine flowers during the following spring. Just cover them with a bottomless box and a pane of glass over the top. The germination of Snapdragon seed has proved to be easiest if finely sifted coal ashes are used as a seed bed. Prepare your seed pan in the usual way and add a layer of finely sifted coal ashes 1 inch deep on the top. Sow the seed thinly on top of the ashes and water carefully. Keep moderately moist in a fairly warm place until the seedlings appear.

**Six Rustproof Maximum Varieties**

The development of these new Rustproof Snapdragons is one of the greatest accomplishments ever made by plant breeders. It is possible now to have them grow to perfection even where the old strain has proved a complete failure due to rust infection. These new Maximum varieties grow about 3 feet in height and bear an abundance of long, strong flower stems set with giant blooms of perfect form. As they are highly rustproof, success with them is most certain.

1187 **Alaska.** A very lovely variety with magnificent and stately spikes closely set with mammoth white blooms. Produces from 12 to 14 spikes to each plant.

1189 **Campfire.** A really marvelous new variety with gorgeous blooms of a pure luminous scarlet enhanced by a bright golden yellow lip. Produces 15 to 18 spikes per plant.

1193 **Copper King.** A marvelous blend of copper shades ranging from light coppery gold to deep rich velvety coppery orange. Has 12 to 16 spikes per plant.

1195 **Crimson.** Outstanding not only for its pure crimson flowers but also for the rich green foliage and dark plum-colored stems. Very vigorous and free flowering.

1197 **Loveliness.** Pure soft rose-pink flowers of splendid form and extra-large size. Gives a marvelous display with 12 to 16 spikes produced to a plant.

1199 **Yellow Giant.** The glistening deep yellow flowers give a splendid effect. They are very large and beautifully arranged on a fine strong spike. 12 to 14 spikes per plant.

Dreer’s Selected List of Newer and Better Vegetables

In each class of vegetables we find some that are superior to others in one or another characteristic. It may be extra earliness, particularly attractive appearance, superior flavor, or an ideal combination of many desirable factors. Such vegetables logically become leaders and among such leaders the finest strains are most eagerly sought by the growers.

On this and the following pages we offer what we know to be prize strains of distinctly worth-while leaders among the most useful vegetables. They are not necessarily novelties but rather specialties which have won their way to the top through meritorious performances in gardens of Dreer customers everywhere.

23 Bean—Bountiful

A most remarkable Bush Bean with bright green pods measuring 6 inches long and ½ inch wide. They are brittle, tender, perfectly stringless, and very tasty. Enjoy a tremendous popularity as it combines good appearance and choice flavor with vigorous growth and remarkable resistance to disease. It has proved of particular value on lighter soils where the Round-Pod varieties often fail to produce satisfactory crops. Bears the bulk of its crop within 75 days after planting with the first picking being ready in about 60 days. Pkt. 10c; ½ lb. 25c; lb. 40c; 2 lbs. 75c; 5 lbs. $1.65.

110 Bush Lima—McCrea’s

With so many good Lima Beans already in existence one may wonder as to the desirability of adding still another variety to the list. Those who will grow this new McCrea’s Bush Lima will readily understand our reason for recommending this new variety. It is without question the sweetest of all Lima Beans. Though its sweetness is without doubt the most outstanding characteristic, it has many other splendid features that will appeal to both home gardeners and canners. The habit of the plants is vigorous and strong. The growth is upright and there is an abundance of rich green foliage. The short stout pods are very thick. Each pod contains from 3 to 5 large, plump, bright green beans which are so tightly packed in the pod that many of them are almost square. Very productive and of good flavor. Pkt. 10c; ½ lb. 25c; lb. 40c; 2 lbs. 75c; 5 lbs. $1.65.

It will pay you to grow these New and Better Vegetables for increased yield and finer quality.

204 Cabbage—Golden Acre

This excellent variety is the earliest round-headed cabbage in existence. It will mature at least 7 days ahead of the regular strains of Jersey Wakefield, considered the standard early of the country. The heads of Golden Acre are perfectly round, firm, and of exceptionally fine texture there being no heavy mid-ribs. An average head weighs about 4 pounds and most of this weight is head since there are but few outer leaves. May be planted close in the row. Pkt. 15c; ½ oz. 30c; oz. 50c; ½ lb. $1.30.

223 Chinese Cabbage

Improved Peking

A most desirable variety of this delectable and palatable vegetable. Forms a long compact head which blanches to a creamy white except the few outer leaves which are bright green. Very crisp and tender being excellent served as cole slaw or cooked like Cabbage. Has a milder, more pleasing, and finer flavor than ordinary Cabbage. Sow between mid-July and early August for a crop in late fall. Pkt. 10c; oz. 30c; ½ lb. $1.00.

162 Beet—Rosebud

We consider this new Beet worthy of a place in every garden because it combines most attractive appearance with choice quality. The roots are perfectly round having a very small neck and a thin tap root. They are smooth and free from undesirable side roots. The skin is rich red and the flesh beneath is a beautiful deep red showing no light zones. Ideal for canning and pickling as well as for home cooking. Most delicious when ½ inches in diameter. Pkt. 10c; oz. 25c; ½ lb. 60c; lb. $1.50.

237 Carrot—Imperator

This Carrot represents a most desirable combination of choice eating qualities and splendid appearance. The roots grow 7 to 8 inches long. They have a broad shoulder and gradually taper toward a fine thin tap root. Due to their form they are easy to harvest. The flesh also is most attractive—a rich deep orange. Being exceptionally fine grained it cooks very tender besides having a sweet and mild flavor. Pkt. 10c; oz. 25c; ½ lb. 60c; lb. $1.75.

327 Sugar Corn

Dreer’s Extra-Early Independence

We highly recommend Dreer’s Extra-Early Independence to all gardeners who desire a first-class early Sugar Corn. The plants make a vigorous growth and produce a splendid crop of large, well shaped ears measuring 6 to 7 inches in length. There are 10 or 12 rows of grains neatly arranged in straight rows around a small cob. The thin-skinned grains are milky white and have a lusciously sweet and tootsie flavor. Well suited to succession plantings for a continued supply. Pkt. 10c; ½ lb. 25c; lb. 40c; 2 lbs. 70c; 5 lbs. $1.65.

383 Cucumber—Longuc

A fancy Cucumber growing 12 to 13 inches in length. Of beautiful appearance with deep green skin and few spines. Greatly resembles the greenhouse product though it is as well suited to growing outdoors as under glass. Its surprising earliness is another of its valuable features. Has beautiful white flesh of rich flavor. Pkt. 15c; oz. 30c; ½ lb. 80c; lb. $2.75.

All Vegetable Seeds offered in this catalog are sent PREPAID within the U. S. A. at the prices quoted
458 Lettuce—Unrivalled

A handsome early Butterhead Lettuce of extra choice quality. Develops well formed, closely folded heads with golden yellow hearts within 60 days from sowing. An all season variety for cool sections but best for spring sowing where summers are hot. The well-blanched heart is crisp and has a rich buttery flavor. Pkt. 10c; oz. 20c; ½ lb. 70c.

Honey Rock Muskmelon

This new Muskmelon is outstanding for the delicious sweetness and rich aroma of its tender, luscious, salmon-colored flesh. The fruits are almost round. They are of medium size but have extremely thick flesh surrounding the small seed cavity in the center. The skin of the heavy fruits is a gray-green color showing a rough netting. Pkt. 10c; oz. 20c; ½ lb. 70c; lb. $1.75.

559 Muskmelon—Honey Rock

This is the best of the large sweet Spanish Onions. Valued for its exceptionally mild and sweet flavor. We consider it particularly desirable because it will grow to truly enormous size if conditions are anywhere near favorable. In some ways it resembles the popular Prizetaker but the onions are considerably larger and consequently heavier in weight. The onions are round and have a beautiful golden yellow skin and pure white flesh. With the proper culture they will develop into magnificent specimens of the prize-winning type. For exhibition start the seed indoors early and transplant to the garden at the proper season. Pkt. 10c; oz. 30c; ½ lb. 90c; lb. $3.00.

587 Onion—Valencia

This variety does not form any bulbs but it is grown extensively for green onions and scallions. Sow the seed thickly in rows and earth up the plants gradually to blanch the lower 3 or 4 inches of the thick stalks. Pkt. 10c; oz. 25c; ½ lb. 75c; lb. $2.25.

588 Onion

White Bunching

This is an entirely new type of Pea differing from the regular garden peas in that the tender, thick fleshed pod is as delectable and fiberless as the large, round peas within. Naturally using the entire tender pods cooked like String Beans produces a great increase of edible luscious produce with the least amount of waste per plant.

696 Sugarstick

This is an entirely new type of Pea. The pods are elegantly curved and they have fleshy walls which are entirely free from fiber or hard tissue. The peas in the pods are large and tender, and of the same luscious sweetness as the walls of the pods. If desired, the peas may be shelled and cooked separately so that two distinct delicious vegetables may be secured for table use. The sliced pods make a splendid addition to mixed salads.

The sturdy vines grow 4 feet tall and are very productive. Every gardener should give this new and most distinct variety a careful trial.

Pkt. 15c; ½ lb. 45c; lb. 80c; 2 lbs. $1.50; 5 lbs. $3.50, prepaid.

Many enthusiastic letters have been received from customers who last year grew this most remarkable new Sugar Pea.
602 Parsley—Drer's Exhibition

This new Parsley is bound to become extremely popular as it combines attractive appearance with the finest qualities of a culinary herb. The compact plants are just one solid mass of finely divided and curled leaves of a most pleasing rich and bright deep green color. The finely cut foliage resembles a bunch of moss and it may well be grown as an edge to the flower border on account of its ornamental form. Pkt. 10c; oz. 25c; ½ lb. 75c; lb. $2.25.

611 Parsnip—Short Thick

Many gardeners find that harvesting the long Thick Parsnips is quite a task particularly when grown on heavy soil and this new half-dwarf white variety is therefore bound to become very popular. The roots grow 6 to 7 inches in length tapering from a broad shoulder to a fine tap root. It has a deeply set crown and matures very early. Beautiful, white, sweet flesh which is tender and palatable. Pkt. 10c; oz. 15c; ½ lb. 40c; lb. $1.25.

677 Pea—Mammoth Pod—Extra-Early

An extra-early variety with large and smooth seeds. May be sown as early as the middle of the spring as the ground can be prepared. A great favorite because it is a heavy producer with vines which grow 3 feet high being loaded with pods measuring 3½ to 4 inches in length. The large bright green peas have a sweet and delicate flavor. Pkt. 10c; ½ lb. 25c; lb. 40c; 2 lbs. 75c; 5 lbs. $1.75.

711 Pepper—California Wonder

A late Pepper most popular in all parts of the country. The sturdy upright plants bear from 6 to 8 smooth, blocky, deep crimson fruits each. They measure 4½ inches in length and 4 inches across. The most outstanding feature of the fruits is the remarkable thickness of their walls. Pkt. 15c; ½ oz. 35c; oz. 60c; ½ lb. $1.75.

758 Pumpkin—Philadelphia Bush

This new Pumpkin should be of the greatest interest to all those who have vegetable gardens of limited size. Being of bush form it is well suited to the smaller garden because it requires no more room than a good-sized Tomato plant. The rounded fruits have a dark green skin which turns a deep orange-yellow. The deep yellow flesh is dry and has a sweet flavor. Splendid for pies, baking, etc. Pkt. 15c; oz. 30c; ½ lb. 95c.

849 Spinach

Bloomsdale Long-Standing Savoy

An early, hardy Spinach with dark glossy green leaves which are heavily crumpled and savoyed. It combines all the good qualities of the best savoy strains with remarkable long-standing properties. Will remain in perfect condition 2 weeks longer than other savoy strains. Pkt. 10c; oz. 15c; ½ lb. 25c; lb. 60c.

784 Radish—Glowing Ball

We recommend this new variety most highly as we are sure that the attractive, perfectly round, brilliant orange-scarlet radishes will appeal to every gardener. The flesh beneath the thin skin is a crisp icy white of a snappy and refreshing flavor. Pkt. 10c; oz. 20c; ½ lb. 45c; lb. $1.25.

770 Radish—Cardinal Globe

Few other Radishes exhibit such remarkable uniformity in shape, size, and quality. Produces perfectly round globes within 30 days after sowing. Has brilliant cardinal red skin and pure white flesh of icy brittleness and a snappy flavor. Pkt. 10c; oz. 20c; ½ lb. 50c; lb. $1.50.

857 Spinach—Viking

In this new Spinach we have a wonderful combination of the long-standing qualities of King of Denmark with the heavy yield of Thick-Leaved or Viroflay. Though thick-leaved it will cook exceptionally tender and it also is easily washed clean of sand or soil in preparation for the table. The plants are very large and most attractive for the color of the leaves is a beautiful dark green. This color is well retained after cooking which gives it a most appetizing appeal when served. Viking is a most profitable new Spinach for the home gardener. Pkt. 10c; oz. 15c; ½ lb. 35c; lb. $1.00.

915 Tomato—Italian Canner

A very distinct variety bearing an enormous crop of medium-sized bright red fruits of a distinct oblong shape. The interior of the fruits is solid and pulpy. Splendid for salads, cooking, and canning whole. Pkt. 15c; ½ oz. 40c; oz. 75c.

926 Tomato—Marhio

Attractive round fruits with a beautiful thin bright pink skin and bright pink flesh. Solid and juicy. A productive variety showing the same wilt-resistant quality as Marglobe. Pkt. 10c; ½ oz. 30c; oz. 50c; ½ lb. $1.50.

These new and improved varieties will give vegetables of choicest quality
The summer-flowering bulbs represent a valuable class of plants because with bulbs good results are obtained easily and quickly whether they are grown outdoors in the garden or in pots indoors. Gloriosa §
Superba, Rothschildiana
Climbing Lily
A splendid tropical climber, easy to grow in a warm greenhouse and does well in sheltered spots out-of-doors. Grown to 10 feet high, producing large, gorgeous, Lily-like flowers which open a bright yellow, but change to a deep scarlet. In bloom through the summer and autumn months. Strong tubers, $1.00 each; $10.00 per doz.

Ismene calathina
Peruvian Daffodil
A grand summer-flowering bulb with large, fragrant Amaryllis-like white blooms with apple green markings in the throat. Very easy to grow. Keep bulbs in a warm dry room and plant out in June. Take up in October and store warm and dry during the winter. They do best in a well-drained fertile soil where they will multiply rapidly. 25c each; $2.50 per doz.

Lilium—Summer-Flowering Lilies
Lilies are among the most beautiful hardy plants. They are easy to grow and give a wonderful effect yet they take little room tucked away among perennials in the border where their towering spikes reign supreme.

Auratum (Gold Banded Lily of Japan), @ 3-5 ft. Large, graceful, fragrant, ivory white flowers thickly studded with deep crimson spots and striped through the center with golden yellow. Blooms from July to September. Cannot endure lime. Cover bulbs 8 inches deep. Extra-large flowering bulbs 40c each; $4.00 per doz.

Formosanum (Dream or New Wonder Lily), 3-4 ft. Gorgous large pure white trumpets tinted rose outside. Richly fragrant, blooming profusely in August and September. Plant in sun. Cover bulbs 6 inches deep. 30c each; $3.00 per doz.

Regale (Regal Lily), @ 3-5 ft. Magnificent, large, trumpet-shaped, sweet scented, white flowers, shaded pink on the outside and tinged with canary yellow at the base. Endures lime. Blooms in July. Cover bulbs 7 inches deep. 25c each; $2.50 per doz.

Speciosum album (White Show Lily), @ 3 ft. Large white trumpets with greenish band. Blooms in August and September. Impartial to lime and does well in either sun or shade. Cover bulbs 8 inches deep. 50c each; $5.00 per doz.

Speciosum magnificum, @ 4 ft. Large ivory white suffused with rosy crimson and spotted with pink. Makes a fine show and is easy to grow. August and September. Cover bulbs 8 inches deep. 40c each; $4.00 per doz.

Tigrinum splendens (Improved Tiger Lily), @ 4-5 ft. Bright orange-red, spotted black. Endures lime as well as shade. Blooms in August and September. Cover bulbs 8 inches deep. 30c each; $3.00 per doz.

Drerer’s Superior Mixed Gladiolus

There are over two hundred different varieties of Gladiolus included in this mixture. No wonder that gardeners everywhere are highly pleased with it. May we say that our mixture for 1939 is even better than any other we have ever had before as we kept a very close watch on our fields this summer and made careful notes as to which colors may be added in order to still further improve the magnificent color effect. All are of number one size which has proved to be the most desirable since it produces the finest spikes.

Number 1 size, 1½ inches and over in diameter, 40c per doz.; $3.00 per 100; $27.50 per thousand.

Gladiolus thrips are not difficult to control and we shall send with every shipment of bulbs a leaflet that gives complete instructions on how to control thrips that have found their way to your plants. Of course the bulbs we send are entirely thrips-free. They have been carefully treated in a thorough way to eliminate all possibilities of harboring any kind of insects or diseases.

Dreer's New Improved Extra-Heavy Lawn Mixtures

Weigh 25 Pounds per Measured Bushel

Your lawn represents the most important single feature toward the beauty of your home grounds. It deserves your most careful consideration as its beauty and permanence depend primarily upon the quality of the seed sown. You can rely upon Dreer's New Improved Lawn Mixtures to give you first class results. Sow 1 quart to every 200 square feet, 6 bushels per acre.

6100 "The Dreer" Lawn Grass
An Unequaled Mixture for a Beautiful Lawn

"The Dreer" Lawn Grass produces a smooth rich green sod of finest texture altogether free from grasses which are inclined to produce clumps or knots. Such a lawn is bound to enhance the beauty and permanence of your home grounds providing a rich green setting that cannot be achieved in any other way. All grasses included in this superb mixture are permanent, fine-bladed, and of a rich green color. Those who realize the great importance of a first class lawn will choose "The Dreer" in preference to all others.

Pt. 30c; qt. 50c; 2 qts. 90c; 4 qts. $1.70; peck $3.25;
1/2 bu. (12 1/2 lbs.) $6.25; bu. (25 lbs.) $12.00; 100 lbs. $47.00, transportation paid.

6102 Dreer's "Evergreen"
A High-Grade Mixture

Though less expensive than "The Dreer" Lawn Grass this superb mixture produces a beautiful and permanent lawn. It is made according to our own special formula and is composed of rich grasses which will produce a lawn of rich green color and velvety appearance. It is composed entirely of choice, thoroughly re-cleaned grasses which accounts for the heavy bushel weight—a feature that insures a good heavy stand from the very beginning.

Pt. 25c; qt. 40c; 2 qts. 75c; 4 qts. $1.30; peck $2.50; 1/2 bu. (12 lbs.) $4.90; bu. (25 lbs.) $9.50; 100 lbs. $37.00, transportation paid.

6106 "Fairmount Park"
Our Popular Low-Priced Mixture

Where large areas are to be seeded or wherever a good stiff covering of permanent and rich green grasses is the main object our special "Fairmount Park" Lawn Mixture should be sown. It is well suited to various soil conditions giving excellent results even on small city grass plots where the soil is frequently rather stiff and heavy. It will form a thick turf in a very short time and can stand considerable hard wear.

Pt. 20c; qt. 35c; 2 qts. 65c; 4 qts. $1.15; peck $2.20; 1/2 bu. (12 lbs.) $4.00; bu. (25 lbs.) $7.50; 100 lbs. $29.00, transportation paid.

6110 "Shady Place"
Gives A Velvety Smooth Sod

The difficulty of establishing a lawn in a semi-shaded position or in places which are shaded during part of the day is easily overcome by the use of Dreer's "Shady Place" Lawn Grass Mixture because it is composed of specific kinds of grasses which naturally grow best under such conditions. Dreer's "Shady Place" Lawn Grass will give you a rich verdant lawn of good appearance. Feed and water the area regularly to stimulate growth.
